NovaEdge Awareness	Organic Search	2,269	2,269	2,269	2,269

Annotations:

- **Finding:** Overall campaign response rate is 27.1%. Implication: a large share of leads does not convert to a campaign response. Action: prioritize campaign channels and audience segments with the strongest response performance before reallocating budget.
- **Implication:**A large share of leads does not convert to a campaign response, so marketing efficiency may vary materially across channels and audiences.
- **Action:**Prioritize campaign channels and audience segments with the strongest response performance before reallocating budget.
- **Finding:** Partner Referral generated 757 leads, while Direct Mail generated 134 leads. Implication: lead volume is concentrated in a small number of channels. Action: compare response and downstream conversion by channel before scaling high-volume acquisition sources.

Sales Pipeline

Revenue performance dashboard with KPI cards for total deal revenue, deal counts, win rate, average deal value, and won vs lost deals by stage

Total Deal Opportunities

Aggregate count of opportunities in sales pipeline

496

Average Deal Value

Mean opportunity size across sales pipeline

1.59K

Total Deals Won

Distinct opportunities closed in won stage

315

Total Deals Lost

Closed Lost opportunities across sales pipeline

184

Deal Win Rate Percentage

Closed won deals as share of all closed opportunities

63.5%

Opportunity Count by Deal Stage

Distribution of pipeline opportunities across sales stages

Annotations:

- **Finding:** The sales pipeline contains 315 won deals and 184 lost deals, producing a 63.5% win rate. **Implication:** nearly four out of every ten closed opportunities are still lost. **Action:** analyze lost-deal patterns by region, product, and deal size to improve conversion.
- **Implication:** Nearly four out of every ten closed opportunities are lost, leaving material room to improve sales conversion.
- **Action:** Analyze lost-deal patterns by region, product, and deal size, then target coaching and follow-up improvements where losses are highest.
- **Finding:** Average deal value is approximately 1.59K across 496 opportunities. **Implication:** small improvements in win rate or deal size can materially affect pipeline value. **Action:** focus sales coaching on high-value opportunities and regions with below-average conversion.
- **Implication:** Small improvements in win rate or average deal size can materially affect the value generated from the current opportunity pipeline.
- **Action:** Focus sales coaching and account planning on high-value opportunities and segments with below-average conversion.

Annotation:

- **Finding:** The At-Risk Accounts table combines distinct support-ticket counts with CRM deal revenue by account. **Implication:** accounts with elevated support demand and material revenue exposure may be at greater retention risk. **Action:** prioritize joint Customer Success, Support, and Sales outreach for accounts with high ticket counts and high deal revenue.
- **Implication:**Accounts with elevated support demand and material revenue exposure may face greater retention risk.
- **Action:**Prioritize joint Customer Success, Support, and Sales outreach for accounts with high ticket counts and high deal revenue.
